Porto, 2025

Engaging for impact; 3 tools to help you explore impact through your research

Research at Universities of Applied Sciences aims to create societal impact. A prerequisite for impact is strong engagement with stakeholders. Ideally this engagement begins before the research proposal has been written, underpinning what we do and why. In this workshop you will explore practical tools to engage with stakeholders that can support you to co-create impactful research proposals.

Facilitators:

Ruth Currie, University of the West of Scotland

Daan Andriessen, Utrecht University of Applied Sciences

Daan Andriessen is professor of research competence at Utrecht University of Applied Sciences. He is codeveloper of the toolkit Circling around your research (<https://husite.nl/crjo-en/>), a toolkit for the co-creation of research proposals.

Ruth Currie is lecturer of Researcher Development at the University of the West of Scotland. In her role, she supports the development of researchers and research practice for staff and postgraduate researchers.
